Walkers has the same 5.0 stars and 20 reviews as Spartan. So why is Spartan #1 at your own address?

Columbus homeowners search for basement waterproofing about 580 times a month. As you get Walkers back up and running, this report shows where those searches go today, why, and five changes that would put Walkers in front of them.

The short version

- **The demand is there.** About 580 searches a month for basement waterproofing in Columbus, and advertisers pay $56 to $62 for each click.
- **Your reputation is perfect.** 5.0 stars from 20 Google reviews, every one of them five-star, and you've replied to all 20.
- **But most homeowners won't find you.** You're in the map's top 3 at 2 of 9 points, both on the west side. At your own address you're #14. ChatGPT, Gemini and Perplexity named Walkers in 0 of 6 answers, and you don't show in regular Google results.
- **Three things explain most of it:** no new Google review since December 2023, no website on the profile, and Walkers is on 3 of the 11 sources AI quotes for Columbus, against 8 for Rogers. Thumbtack and Angi, the two AI quotes most, don't

have Walkers.

- **What it's worth:** reaching #3 for these searches is about $800 a month in clicks you'd otherwise buy as ads. At #1 it's closer to one extra job a month.

What Walkers is already doing right

✓ A perfect 5.0 from 20 Google reviews: all 20 are five-star

✓ You've replied to every single review. Few contractors do that

✓ Customers keep mentioning the same things: on time, thorough, no leaks after the next rain, and fair prices compared with the bigger companies

✓ You're already #1 on the map southwest of your office and #2 to the west

✓ A complete Google profile: 410 photos, a written description and hours for every day

✓ You already have BBB, Porch and Yelp profiles and a Dry Basement Hub listing, and BBB and Dry Basement Hub are both pages AI quotes

WHAT THIS SHOWS

Spartan has exactly your rating and review count, so this isn't about the quality of your work. The difference is everything around the profile. Spartan links a website and holds a top-3 map spot at 4 of the 9 points, including #1 at your own address, where Walkers is #14. Rogers and Mid-State are each named in 5 of the 6 AI answers, and Rogers is on 8 of the 11 sources AI quotes. Mid-State's 590 monthly name searches are what being recommended everywhere looks like.

Name searches and website authority: Ubersuggest (US), 3 Nov 2026. Walkers has no website, so there is no authority score.

What getting into the top 3 is worth

$800 a month more in clicks you'd otherwise have to buy as Google Ads, just by moving to #3 for 580 monthly searches

Where you rank	Visits / month	Same clicks as ads	Est. jobs / month*	Est. job revenue*
Today	0	$0	0.0	$0
Position 3	14	$823	0.2	$1,526
Position 2	25	$1,505	0.4	$2,788
Position 1	52	$3,106	0.8	$5,756

Searches: "basement waterproofing columbus ohio" (260), "basement waterproofing columbus oh" (320). *Jobs assume 5% of visitors call or fill in a form and 30% of those become jobs, at $7,368 a job (Angi's average basement waterproofing cost for Columbus, OH). These are assumptions, not data about your business. Search volumes and cost per click: Ubersuggest (US), 3 Nov 2026. Click rates: seoClarity 2025 mobile study for regular Google results, used as a cautious stand-in for the map top 3, which usually gets more clicks. Today's visits are 0 because there is no website for Google to send them to.

Your 5 fixes, in order

1 **Restart your Google reviews: text past customers a direct review link** — High impact

Start with customers from the last few years, then send it after every job. A handful of new reviews tells Google, and homeowners, that Walkers is active again. Keep replying to every one, as you already do.

About 20 minutes to set up, then 2 minutes a job

2 **Tidy the Google profile** — High impact

Remove the Painter and Painting categories, add your services (crack repair, interior drainage, sump pumps), and post a short "back up and running" update with a few recent job photos. Then switch Porch from General Contractor to Waterproofing.

About 30 minutes

3 **Put up a simple website and link it from the profile** — High impact

One page is enough: what you fix, the areas you cover, your warranty, your 20 reviews and a tap-to-call number. It gives Google, Perplexity and ChatGPT something to read and quote.

A few days, start to finish

4 **Get onto the lists AI quotes** — Medium impact

Start with Thumbtack and Angi, the two sources AI quoted most (one Angi profile also covers HomeAdvisor). Then the Entrepreneurs of Columbus top-rated list, TenBestFind, Biddaro and the 2026 "7 Best Basement and Foundation Experts in Columbus" roundup. Use exactly the same name, address and phone as Google.

A few hours of submissions

5 **Text back missed calls automatically** — Medium impact

When you're on a job and miss a call, the homeowner gets an instant text so they don't call the next company on the list.

About an hour to set up

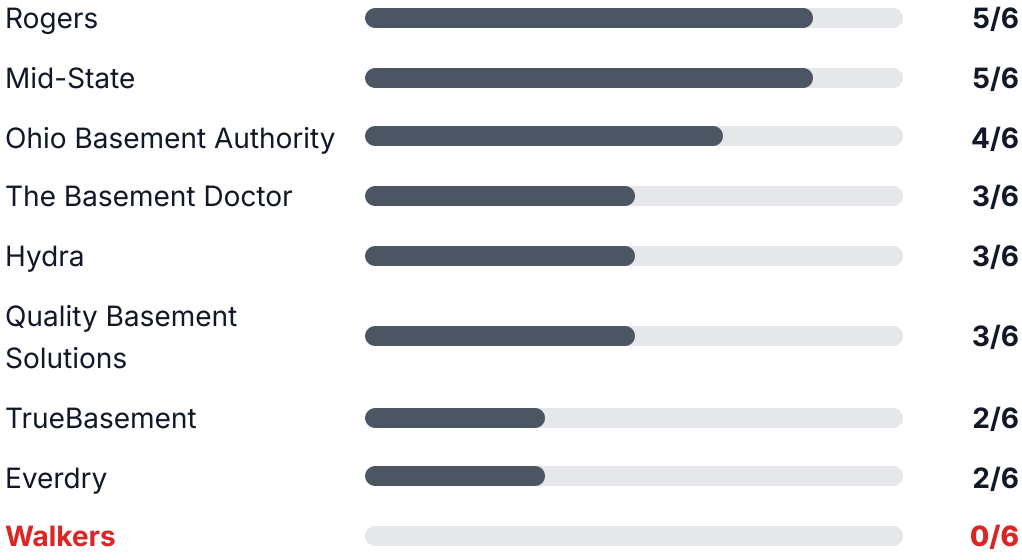

Only fix #3 needs a website, and a simple one-page site will do.

WHAT THIS MEANS

AI assistants recommend businesses they can read about in several places: a website, directories and "best of" lists. Today, Walkers' Google profile and one directory listing are nearly all there is to read about you, so there's little for them to quote. Across 6 answers, Rogers and Mid-State were named 5 times each and Walkers 0 times.

Google Map Rankings 15%

Searching **"basement waterproofing"** from 9 points around your office. Average rank **9**; top 3 at **2 of 9** points.

Top 3 at your office (centre pin):

1. Spartan Wall Repair & Basement Waterproofing
2. MBR Basement Repair
3. Mid-State Basement Systems

3×3 grid, 5 miles from your Google address in each direction, 03 Nov 2026. "20+" means not in the top 20 at that point.

WHY IT MATTERS

Walkers makes the map's top 3 only on the west side: #1 to the southwest and #2 to the west. At your own address you're #14, behind Spartan, MBR and Mid-State, and a search from central Columbus puts Walkers 12th. Most homeowners call from the top 3, so a search at any of the other 7 points sends the call to someone else.

Also worth fixing

- **No website linked**
  The one empty field on an otherwise complete profile. Google treats a linked website as a sign the business is established.
- **Painter and Painting are listed as categories**
  Google uses categories to decide which searches you show up for, and unrelated ones dilute the waterproofing signal. The same thing shows up elsewhere: Porch files Walkers under General Contractor.

WHAT YOUR CUSTOMERS ALREADY SAY

Customers consistently describe punctual, thorough work and basements that stayed dry after the next rain. Several say Walkers felt more trustworthy than the larger companies that also quoted them. That's exactly what people look for when choosing a waterproofer.

Google Maps, 03 Nov 2026 (last 20 reviews sampled). Facebook rating not checked, so it's left out of the score.

WHY IT MATTERS

Your 20 reviews are perfect, but the newest is from December 2023. Google gives weight to recent reviews when ranking the map, and homeowners notice dates. Rivals keep collecting them: Rogers has 63, Mid-State has 787. Starting reviews again is the quickest way to signal that Walkers is active again.

WHY IT MATTERS

ChatGPT, Gemini and Perplexity built their answers from these pages. Walkers is on BBB, Porch and Dry Basement Hub, but not on Thumbtack or Angi, the two sources AI quoted most (5 times each), or on the Columbus "best of" lists. In the r/Columbus thread AI quoted, neighbors recommend Rogers, Hydra, C&J and others by name, and nobody mentions Walkers yet.

Website

No website linked on the Google profile — **None**

Nothing to test for speed or SEO, so this section is left out of the overall score.

WHY IT MATTERS

Regular Google results for "basement waterproofing columbus ohio" are all websites, lists and forums. Without a site Walkers can't appear here, and the two companies AI recommends most, Rogers and Mid-State, sit at #2 and #3. A simple one-page site with your services, area, reviews and phone number is enough to get started.

WHY IT MATTERS

Google and AI tools check a business's website to confirm what it does and where. Without one, Walkers can only compete on the map, and homeowners who want to look you up before calling have nowhere to go.

WHY IT MATTERS

Homeowners often find water in the basement at night or on a weekend. With no site, the only option is a call, and if you're on a job it may go to voicemail while they try the next company.

How we measured this

- Map grid, Google profiles and reviews: Google Maps data collected 3 Nov 2026. Spartan's rating and review count come from Google's "People also search for" panel.
- AI answers: ChatGPT, Gemini and Perplexity, each asked both questions once via MentionScout on 3 Nov 2026 (6 answers). Answers vary from day to day, so we re-run them before any call.
- Search volumes, cost per click, name searches and website authority: Ubersuggest (US). Google results order and the central-Columbus map search: live Google results via Serper, 3 Nov 2026. Listings on Thumbtack, Angi, HomeAdvisor, BBB and Porch were checked with a Google site: search for each company's profile.
- Anything we couldn't measure is marked "Not checked" and left out of the score rather than counted against you. With no website, the website speed section is left out of the overall score too. Dollar figures are estimates, not forecasts.
- Overall score = average of the 5 scored sections, the way GoHighLevel-style marketing audits grade. AI readiness is scored separately.
